## Rail bike tour

A 4 km ride on a specially adapted railbike offers a truly unique experience. Pedal along a historic narrow-gauge railway – a piece of industrial heritage that lets you feel the charm of the past and imagine how little trains once travelled these very tracks. The scenic route takes you from the village of Zilaiskalns to a nearby peat bog, offering a peaceful blend of nature and history. Each railbike accommodates up to four people: two can enjoy pedaling while the others relax in comfortable passenger seats.

## Zilaiskalns

A sacred place wrapped in legends and stories, where everyone can walk up to the peak and enjoy the diversity of nature. At the peak of the hill stands a 38,5 meters high observation tower, which offers a wide panoramic view of the Zilaiskalns nature reserve and the surrounding area.

## Zilaiskalns Cultural History and Visitor Center

Industrial heritage site with a view of the surrounding nature and Zilaiskalns village. There is a historical water tower at the foot of Zilaiskalns, where Zilaiskalns Cultural History and Visitor Center is located, there you can take a look at the historical exposition about nature site and holy place of Zilaiskalns, and also industrial heritage object - the watertower. Visitors are able to rise above Zilaiskalns and look into the history of the narrow gauge railway locomotive with the help of VR. During the visit, the guide will tell stories about Zilaiskalns and take guests to the top of the water tower to have a panoramic view at Zilaiskalns village.

## Zilaiskalns Health trail

The 3.5 km long circular nature trail begins at Zilaiskalns Cultural History and Visitors Center. Along the route, there are 12 educational stops, some of which feature fun physical exercises and agility challenges for visitors of all ages.
